PARISHRAM 2.0 2026 (Class 12th)

Biology (Zoology)

DPP: 2

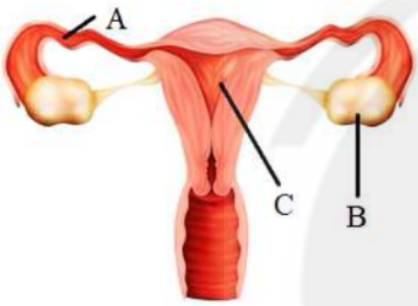

Human Reproduction

Q1 Which gland is responsible for lactation in females?

(A) Prostate gland (B) Cervix

(C) Mammary gland (D) Ovary

Q2 Observe the given image and choose the incorrect option

(A) Infundibulum the region in A is closer to uterus.

(B) The shedding of C every month is known as menstruation.

(C) B helps in production of female hormones and also site for egg synthesis.

(D) None of the above

Q3 The external thin membranous _____(i)_____ middle thick layer of smooth muscles ___(ii)_____ and inner glandular layer ____(iii)_____ lines the uterine cavity.

(A) (i) Perimetrium (ii) Endometrium (iii) Myometrium

(B) (i) Endometrium (ii) Perimetrium (iii) Myometrium

(C) (i) Myometrium (ii) Perimetrium (iii) Endometrium

(D) (i) Perimetrium (ii) Myometrium (iii) Endometrium

Q4 Which of the following represents the correct sequence of structures involved in milk flow within the mammary gland?

(A) Lactiferous duct Mammary ampulla Mammary tubule Alveoli

(B) Alveoli Mammary tubules Mammary ducts Mammary ampulla Lactiferous duct

(C) Alveoli Lactiferous duct Mammary ampulla Mammary tubule Mammary ducts

(D) Mammary ampulla Alveoli Mammary tubule Lactiferous duct

Q5 The stroma of ovary contains

(A) Peripheral medulla and inner cortex

(B) Peripheral cortex and inner medulla

(C) Peripheral cortical and inner medulla

(D) None of these

Q6 **Statement-1 :** The cavity of the cervix is called cervical canal.

Statement-2: The shape of the uterus is like an inverted pear.

(A) Both the statements are false

(B) Statement -1 is true ,Statement -2 is false

(C) Statement -1 is false ,Statement -2 is true

(D) Both the statements are true.

Q7 Identify the number of female external genitalia present in the given list.

Mons pubis, Labia majora, Labia minora, Hymen, Vagina, womb, Clitoris, Ampulla, Fimbriae, Isthmus

(A) Three (B) Five

(C) Eight (D) Seven

Q8 Which two parts in the female reproductive system form the birth canal?
(A) Cervix and Uterus
(B) Uterus and Vagina
(C) Vagina and Cervix
(D) Uterus and oviduct

Q9 **Assertion (A) :** The oviducts ,uterus and vagina constitute the female accessory ducts.
Reason (R) : Accessory ducts help in transport of the gamete.
(A) A and R are true and R is the correct explanation of A.
(B) A and R are true but R is not the correct explanation of A.
(C) A is true R is false
(D) A is false R is true

Q10 The ovary is connected to pelvic wall through _____.
(A) Tendons (B) Ligaments
(C) Epithelium (D) None of these

Answer Key

Q1	C
Q2	A
Q3	D
Q4	B
Q5	B
Q6	D
Q7	B
Q8	C
Q9	A
Q10	B

Hints & Solutions

Note: scan the QR code to watch video solution

Q1 Text Solution:

Ovary and cervix are part of female reproductive system which are not glands. Prostate is male accessory gland.

Video Solution:

Q2 Text Solution:

Part A is oviduct contain three different parts Isthmus, Ampulla and Infundibulum. Infundibulum is near to ovary not to uterus.

Video Solution:

Q3 Text Solution:

(i) Perimetrium (ii) Myometrium (iii) Endometrium

Video Solution:

Q4 Text Solution:

Alveoli Mammary tubules Mammary ducts Mammary ampulla Lactiferous duct

Video Solution:

Q5 Text Solution:

The stroma is divided into two zones – a peripheral cortex and an inner medulla.

Video Solution:

Q6 Text Solution:

Both the statements are true.

Video Solution:

Q7 Text Solution:

Mons pubis, Labia majora, Labia minora, Hymen,Clitoris are part of female external genitalia.

Video Solution:

Q8 Text Solution:

The cavity of the cervix is called cervical canal which alongwith vagina forms the birth canal.

Video Solution:

Q9 **Text Solution:**

A and R are true and R is the correct explanation of A. Reason explains why they are called as accessory glands.

Video Solution:

Q10 **Text Solution:**

Each ovary is about 2 to 4 cm in length and is connected to the pelvic wall and uterus by ligaments.
